## Announcing Computer Power! LLC

Billings, MT, 7/31/2009 — Computer Power! LLC, a new local Computer Service and Web Design Shop, is opening its doors Friday, July 31, 2009! Being one of the most competitive and friendly computer shops in the greater Billings area, Computer Power will redefine your experiences with Computer Service and Web Design.

Computer Power was formed by two local Montana students who have a passion for computers; Amy Kaufman of Billings, MT, currently attending the University of Montana, and Michael Stenberg of Billings, MT, currently attending Montana State University Billings.

“We created Computer Power because we believe that the people in Billings and its surrounding areas deserve more for less,” said Stenberg, “It’s time for the local community to get professional and affordable computer services without having to fear an overwhelming bill at the end of their computer repair or website design.”

“Computer Power is a professional but fun way for us to expand our skills and resumes,” Kaufman said, “We’re passionate about the work we do, and our clients will reap the rewards of an effective and motivated team!”

Computer Services, including repair, virus removal, hardware installation and more, start at a flat rate of \$40. There are no diagnostic, service or hidden fees – just the low rate. The first hour of service is included, and any additional hours are only \$10 an hour.

Website Design starts at \$399.99. Each website designed by Computer Power includes 10 custom images, email addresses, a domain name, sub domains, dynamic pages, search engine optimization, an FTP account, one year of hosting and unbeatable local support. Many other premium services are offered as well.

As one of the testimonials state, “Michael Stenberg is a miracle worker who masters hardware and software computer issues with ease and grace. Amy Kaufman’s artistry creatively transforms a verbal explanation of need into the desired digital media result. Combining their talents mixed up a potent brew resulting in the website of my dreams! Power on with Amy and Michael and Computer Power! LLC!”
